

Everything a Requirements Engineer Ever Wanted to Know about Cognitive Linguistics

...but was afraid to ask

If <we say it> then
<they will understand>

If Bill Clinton had been Prime Minister of the UK, there wouldn't have been as much fuss about Monica Lewinsky.

...unless, perhaps, she had been a young man.

In that case, Clinton would have had to be mayor of San Francisco.

(adapted from Fauconnier)

Language radically
underdetermines
meaning

Elements of cognitive linguistics (Karen van Hoek)

- Conceptual/subjectivist semantics
 - Meaning is in the head
- Encyclopaedic not dictionary semantics
 - Meaning depends on use
- Structured categories
 - Concepts are prototypical, radial, resemblant
- Graded grammaticality/aptness
 - Meaning/translation shifts
- Non-autonomy of syntax
 - Language not separate from gen. cognition

The Naturalistic Turn

- Language is intentional
 - Mental spaces, not possible worlds (Fauconnier)
- Language does not convey meaning
 - Language affords meaning (Turner)
- Language is social
 - Meaning enacts rather than represents (Vygotsky)
- Meaning is grounded in behaviour
 - Grounded metaphor_(Lakoff)

Daily Calendar - Copy of User Data

Thursday September 16, 1999 Week 38

Tasks

- Plastic prints
- Alex Harris (APG Annual) DL (Due: Sep 30)
- Install zip on Gateway
- Install s/w & files on G/way
- Ensure prtr/Pilot compat on Mac
- Replace CTX monitor
- Install zip on CTX
- Install software on CTX

Implicit type-level semantic model

A bestiary of grounded metaphors (Lakoff & Johnson)

- important = big
- difficulty = burden
- more = up
- type of = inside
- similar = near
- degree = position
- arch. = phys. struct.
- help = support
- time = motion
- change = motion
- state = place
- action = self-propulsion
- purpose = destination
- purpose = desired thing
- cause = force
- relationship = enclosure
- control = be above
- know = see
- understand = grasp
- see = touch
